Living Dinosaurs!

Tuesday, November 16, 1999, 7:30 p.m. Erickson Center Rooms A & B, Northwestern College, Roseville

Russ McGlenn, founder of Adventure Safaris and science teacher to home schoolers, will be telling us about his search for Manipogo this summer. Find out how Russ has changed his mind regarding this creature known as Manipogo, living in Lake Manitoba. Video taped interviews of eyewitnesses will be shown.

Are you aware that there are creatures living today that show up in the fossil record? Did you know animals thought extinct, keep popping up in remote areas and cause evolutionists extreme consternation? Many sightings are not reported or investigated because they would embarrass the wrong scientists. Let Russ fill you in on what is known about sightings and evidence regarding dinosaurs long thought extinct, but are found alive and well in our world today. This is evidence you won't find in science magazines, or in public school text books. Russ communicates well with all age groups and you will enjoy this one.

Note the meeting location change. Erickson Center is the first building on the left past the guard shack.

No meeting or newsletter in December. Have a wonderful Christmas.

Jan. 18, 2000 Tim Behrens M.D., U of M Genetic researcher and professor.

Feb. 15, 2000 David Fruehauf returns with more information regarding Old Testament diet and health.

Memberships

Memberships are for the calendar year. Check the letter and number following your name to see if you are paid up. An 'M' followed by 99 means you are paid through 1999. An 'R' or 'S' means you receive a free mailing and you need to renew your request or become a member. We will be pruning our mailing list of those who do not show an interest in receiving the newsletter.

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

I to become a member of TCCSA and I subscribe to the Statement of Belief
(Calendar year membership dues are \$20.00. Students do not pay dues.)

I to renew my membership in TCCSA. (note dues above)

P keep me on your mailing list (must be renewed each year)

I to make a donation to help TCCSA promote Creation Science.

Adventure Safaris

We currently have about 1000 students enrolled in our science programs. It is exciting to see kids really get into science, and this year there are many who are finding science worth getting into. Maybe you know of home schooled families who need additional help with their science curriculum. There are still time slots available for additional classes in the metro area and surrounding communities.

Contact us for information on local safaris planned for this fall including fossil digs and evening astronomy activities. We also provide customized presentations for churches, schools and other groups.

Just a reminder regarding the Science Fair in February at Har Mar Mall. You may want to start planning your project now to assure completion on time. This is a wonderful opportunity to interact with other homeschool families and be a witness in the community that the Bible and science are compatible.
