## Teaching Evidence of a Young Earth in an Understandable Way

7:30 PM, September 21, 2004, Totino Fine Arts Center, Rm. 116, Northwestern College, Roseville, MN

With a degree in Chemical Engineering, Bruce Malone was fully convinced that evolution was an absolute fact until someone presented the evidence for a world-wide flood. In 23 years of church and education not one person had ever presented it as a factual historical happening. This led him on an intensive 8 month search for evidence for creation and evolution. Bruce now has over 12 years of lecturing and writing experience regarding all aspects of science. This talk will show how to present the scientific evidence of a young earth in a way that will hold the attention of listeners and possibly change their lives forever.

Bruce Malone is a Research Leader specializing in foam product development. He is the author of *Search for the Truth*, a book that examines science and reality from a Christian perspective and puts it in bite-sized chunks. An unusual aspect of his book is his permission to copy and distribute portions as much as you want. It can be used by churches, schools or for personal knowledge. His book will be available on the book table. Bruce is married with four children, one is attending St. Paul Bible College here in the Twin Cities. All meetings are free and open to the public. A free-will offering will be taken.

Come at 7 PM for pictures of the 2004 Dig with Russ McGlenn. He will be here with stories and photos to

### Coming up . . .

October 19 - John Nuckols - Isaac Newton

November 16 - Tom Vail - The Grand Canyon

December - No meeting or newsletter

Check [www.tccsa.tc](http://www.tccsa.tc) for other activities in our area.

### Attention all Parents

The same objects appear to all the people of the earth - the rising and the setting of the sun, the dew drops on a leaf. Yet, we Christians alone know the Author of this creation. Why not introduce your child to this Author of creation through a science fair project? The elementary years are a wonderful time to observe and examine the design in nature. Science fair projects for the K-6 students can be experimental or a display. (7th-12th grades are experimental only). Fall is a great time to gather and to examine leaves, feathers, seeds, and bugs. Why not gather monarch caterpillars and watch them grow and change into butterflies? Then create an informational display on what was learned. You can look at leaves and see them change color, then the k-6th grader can put together an informational display on how that happens. If a mom is expecting a new little one, learn about how the baby is developing, then prepare an information display. Is there some illness or disease that is occurring in your family, study that and create an informational display around that topic. Science fair projects do not have to be just experimental. Science fair projects are there to cause the student to go deeper in their curiosities. For more information about the next science fair on Feb. 19-20, 2005 check out our Web site at [www.adventuresafaris.org](http://www.adventuresafaris.org).

### CREATIONWISE

# Adventure Safaris

Schools open, are your children getting a good well-rounded education? If you want a superior Bible-based science education for your children, please contact us. There are still slots available to fit you in. If you have ever heard John Nuckols with his real-life dramatization of an historical person of science, you will want to attend the October meeting. John will present Isaac Newton as you have never heard it before. You will be entertained while you learn of one of the most significant scientists of all time. If you haven't heard him previously, you are in for a real treat. Bring the whole family.

Adventure Safaris presents the Creator and His designs and laws to homeschool coops. Contact us if you are interested in receiving an excellent science education for your students. As a nonprofit organization, we are supported by our school work as well as by interested churches and individuals. All gifts made out to TCCSA are tax deductible. Designate what your gift is for.

You can now go direct to [www.adventuresafaris.org](http://www.adventuresafaris.org) or link from [www.tccsa.tc](http://www.tccsa.tc).
