## CREATION BULLETIN

Dave Johnson, President

February 2005

Vol. 31, No. 2

### A Biologist asks: "Where is the Evidence for God?"

7:30 PM, February 15, 2005, Totino Fine Arts Center Room F116 Northwestern College

Former evolutionist and skeptic Dr. Donald Bierle will be presenting the evidence that changed his mind about the origin and diversity of life. Dr. Bierle, a Ph.D. biologist, said the presentation reflects the life-changing discoveries he made in his own search for answers to life's important questions. "Although I grew up in a family that attended church, God never seemed real or personal. In college I grew enthralled with the academic world. I became convinced that science held the answers," he explained.

"I was still committed to evolution when I professed faith in Jesus Christ," Bierle admitted. "But as I studied books and articles written by evolutionists, it became increasingly clear that they were committed to a philosophical and religious - rather than purely scientific - world view. They held to their 'faith' in evolution even though the crucial evidence for it was clearly lacking."

Come, bring your family and friends who have questions and need answers. Dr. Bierle's books and resources will be available for sale at the meeting.

All meetings are free and open to the public. A free-will offering will be taken.

#### Have you considered. . .

the chickadee's feet? Why don't its feet freeze off during the winter time? In fact, why don't any of these birds lose their feet during these brutally cold winter days? God has designed these bird's feet with a unique heating system. Bird's have a network of arteries that take 106 degree blood down to their feet. This close network of arteries and veins, called a "wonder net," enables the blood to be warmed before entering the body and the feet never get dangerously cold. If evolution were true, how many feet had to freeze off before the bird got it right? NO, the bird's feet were designed by the Master Designer. That is why we see winter birds with feet intact. The next time you see a bird at your bird feeder, consider the chickadee's feet. For more interesting creation facts check out *Letting God Create Your Day* vol.4 from [www.creationmoments.com](http://www.creationmoments.com).

#### Coming up. . .

March 15 - Brian Young - The Pre-Flood World  
April 19 - Bruce Malone - Relevance of Creation

#### Writing Contest

[www.adventuresafaris.org](http://www.adventuresafaris.org) is the place to go for information on this contest. Entries may be submitted anytime before March 15, 2005. What a great way for students to improve their science and writing skills at the same time. Get started today!

## CREATIONWISE

HAVE YOU EVER CONSIDERED  
THAT THE TEACHING OF EVOLUTION  
GIVES KIDS A GREAT REASON TO  
DISRESPECT ADULTS??

# Adventure Safaris

Are you planning to participate in two upcoming activities sponsored by TCCSA and Adventure Safaris?

All students need a general understanding of science and have good research and writing skills. A writing contest will help prepare your children for the future. We encourage you to check our web site to get all the details, rules and even some ideas. All reports are due on or before March 15, 2005. The other activity is our annual Science Fair, February 19-20 at Har Mar Mall in Roseville. Judging is Saturday morning but displays remain through the weekend for shoppers to see and ask questions. These two activities may be done concurrently on the same subject if desired. If you can help with these activities please let us know. They are wonderful learning experiences for everyone involved.

Adventure Safaris presents the Creator, His designs and laws to homeschool coops. Contact us if you are interested in receiving an excellent science education for your students. As a nonprofit organization, we are supported by our school work as well as by interested churches and individuals. All gifts made out to TCCSA are tax deductible. Designate what your gift is for.
