Dave Johnson, President

March 2005

Vol. 31, No. 3

The Pre-flood World

7:30 PM, March 15, 2005, Totino Fine Arts Center Room F116 Northwestern College

This presentation will contrast how the world was prior to the Flood in Noah's time to present day conditions. The speaker uses models and fossils as evidence of man and dinosaurs living at the same time.

Brian Young, a nationally known speaker and author of *Doubts about Creation? Not After This!*; *Genesis: Yesterday's Answers to Today's Problems*; *Revelation: All of God's Word Revealed*; and others, is the founder and director of **The Creation Instruction Association**. He served as a principal and teacher of Christian schools for ten years before becoming a full time evangelist in the Creation ministry. He does jail and nursing home ministry as well as weekly street evangelism along with speaking around the country on the important issue of Creation verses evolution. His topics cover a wide range of areas in which he has done research; while at the same time, stresses Biblical Creationism as the foundation for good education and theology.

All meetings are free and open to the public. A free-will offering will be taken.

From the Archives. . .

Twenty-five years ago - March 1980 - a member of the Minnesota House of Representatives spoke.

Rep. Aasness talked about the non-scientific side of evolution and the philosophical side of humanism. Evolutionism is bad science but is worse as a philosophy. The atrocities committed by communism and nazism, {and abortion} based on evolutionary views of man, are ample proof of its effects.

He was a sponsor of a "Creation Bill" and talked about its progress through the legislature.

Have things changed much in 25 years? Our schools, museums and TV programs continue to promote unscientific theories as fact. Our tax dollars are used to indoctrinate our children with ideas that you probably don't agree with. Its important to hold your elected officials accountable to moral values not just what is "politically correct."

Next Month. . .

April 19 - Bruce Malone - Relevance of Creation

In January we learned about conditions that made it possible for man to live 900 years and more. This month we delve deeper into conditions that existed prior to the Flood.

Next month Bruce Malone returns with "Relevance of Creation: Why America is losing its Christian

Writing Contest - Time is running out

www.adventuresafaris.org is the place to go for information on this contest. Entries must be submitted on or before March 15, 2005. What a great way for students to improve their science and writing skills. Get started today!

If you participated in a Science Fair you can use that in your report.

CREATIONWISE

Adventure Safaris

We had a successful science fair in February. Each year we have entries by students who have tried it before plus lots of new students. It was an enjoyable time for judges, parents, passersby and we hope for the students. Following the judging on Saturday morning, projects were left on display through Sunday. People were there to answer questions regarding the projects, TCCSA and science.

All students need a general understanding of science and have good research and writing skills. A writing contest will help prepare your children for the future. We encourage you to check our web site to get all the details, rules and even some ideas for our 2005 writing contest. All reports are due on or before March 15, 2005.

Adventure Safaris presents the Creator, His designs and laws to homeschool coops. Contact us if you are interested in receiving an excellent science education for your students. As a nonprofit organization, we are supported by our school work as well as by interested churches and individuals. All gifts made out to TCCSA are tax deductible. Designate what your gift is for.
