CREATION BULLETIN

November 2005

Vol. 31, No. 10

Creation in Chalk Art

7:30 PM, November 15, 2005, Nazareth Chapel, Northwestern College

Randal & Stephanie Halverson – Gospel Media Ministries "Creation Chalk Talk"

Through the use of chalk drawing, story telling, lights, sound effects, music and the Holy Scriptures, experience some of the events of creation as documented in Genesis 1. A question/answer time will follow to discuss communicating the gospel through chalk art. This will be a learning and inspirational evening for most ages.

All meetings are free and open to the public. A free-will offering will be taken.

Coming Up . .

December - No meeting or newsletter

January 17 - Dr. Allen Curtis - It's a Young World After All

February 21 - Dr. Charles Aling

March 21 - John Nuckols - Honeybees

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Have you considered...

the whitetail deer's eyesight? Have you noticed that as you stealthily approach a grazing deer, it runs away? A deer can actually see nearby and distant objects **simultaneously** with each eye. Amazing! So, a buck can enjoy grazing and at the same time keep a keen eye out for predators. Notice how a deer's eyes are set, high and wide, this allows a deer to see almost in a complete circle. It is hard to sneak up on a deer!

Did you know that deer have special night vision "goggles" because it is active during low light? Special reflective cells are situated at the rear of its eyes. First, the light enters the eye and most is absorbed. Then light that was not absorbed is reflected back through the retina a second time, allowing it to be absorbed again. We see these "night vision goggles" at work when our headlights expose the eyes of a deer. How did all of this come about by chance? How could a deer see at night? Or how does one eye see both near and far simultaneously? You see all this comes from the Designer's hand.

Election

Our January meeting will include the bi-annual election of TCCSA officers. Membership is for the calendar year so you must renew for 2006 in order to vote. You may renew in November or any time prior to the vote on January 17. See page 2 for membership

Adventure Safaris

By Daniel Nuckols

Rumor has it that Charles Darwin once wrote a fairy tale book...

TCCSA is sponsoring a writing contest again this school year (due Mar. 15) and our annual Science Fair at Har Mar Mall in Roseville on Feb. 18-19. You may combine the two and write about your Science Fair Project. Go to www.tccsa.tc for rules, dates and information about both activities.

Area Creation Science Teachers
