Naomi Hard

Al Heitkamp

Bob Helfinstine  
*President Emeritus*

Ross Olson  
*Webmaster*

Bill Overn

Don Slinger

Welcome to 2007. TCCSA looks forward to another great year of providing interesting speakers offering you solid information on real science.

This past year we held 10 regular monthly meetings plus two additional meetings with speakers of national reputation. Our average monthly attendance in 2006 was 126 and we thank you for your attendance and generosity that allows us to provide excellent speakers. Board members are volunteers so all of your tax-deductible dues and gifts go for speaker expenses, advertising and equipment. Even our room at Northwestern College is provided free of charge. Due to so many wonderful speakers from out of state our funds are a bit low at year-end. If you could put a bit extra in the offering next time and/or become a member it would be very much appreciated.

In 2006 a Creation pioneer, **Dr. Henry Morris**, and one of our favorite local speakers, **Dr. Allen Curtis**, went to their heavenly rewards. We thank God for their influence and the example they left of lives well lived.

Our **web site**, maintained by Ross Olson, is reaching people all over the world. It's becoming so popular that often it pops up first in web searches of Creation or science related topics. If your church or organization is looking for speakers there is a list of local people on our web site. Home school co-ops looking for science teachers should check our list. Check it for updates on our activities and so much more.

On February 17<sup>th</sup> and 18<sup>th</sup> our annual **Science Fair** is scheduled at Har Mar Mall. This is an outreach to the community that attracts public attention. We encourage you to get your kids involved or come out to see what the participants have done. Please pray that the Science Fair will be a witness to many and that Satan will be defeated in the world of science. Our annual **Writing Contest** is open to students in our local area or anywhere via the Internet. It is our goal to raise up scientists and writers who look to the Creator for inspiration. For information on these and other activities visit [www.tccsa.tc](http://www.tccsa.tc).

Russ McGlenn continues to provide curriculum and speaking engagements from his home base in California. The Adventure Safaris Dinosaur Dig in South Dakota is a popular activity for the whole family. Information and pictures are available at [www.adventuresafaris.org](http://www.adventuresafaris.org).

Our newsletter, **Creation Bulletin**, is available in print, email or on the web in PDF format. We currently mail about 560 copies 10 times a year and email about 230 more. We send out an email reminder with any changes that may occur after the paper copy is printed. To be added or removed from our lists - email [david-johnson@usfamily.net](mailto:david-johnson@usfamily.net) or write to the address listed.
