

Slaughter of the Dissidents:

The Shocking Truth About Destroying The Careers Of Darwin Doubters

7:30 PM, November 17, 2009, Totino Fine Arts Center, Room F2128 (Old F116), Northwestern College

Jerry Bergman taught biology, genetics, chemistry, biochemistry, anthropology, geology, and microbiology at Northwest State College in Ohio for over 17 years. Now completing his 9th degree, Dr Bergman is a graduate of Medical College of Ohio, Wayne State University in Detroit, The University of Toledo, and Bowling Green State University. He has over 600 publications in 12 languages and 20 books and monographs. He has also taught at the Medical College of Ohio where he was a research associate in the department of experimental pathology, and he also taught 6 years at the University of Toledo, and 7 years at Bowling Green State University.

The talk will be about his book which covers individuals who have been fired or otherwise mistreated for their faith in the Creator.

All meetings are free and open to the public, an offering will be accepted.

Debate: Dr. P.Z. Myers vs. Dr. Jerry Bergman

"Should Intelligent Design Be Taught In The Schools?"

7:30 PM, November 16, 2009 U of Minnesota, North Star Ballroom, St. Paul Student Center

The event is co-sponsored by Campus Atheists, Skeptics and Humanists (CASH) and Christian Student Fellowship (CSF) at the University of Minnesota.

P.Z. Meyers has stated that teachers who accept intelligent design are pseudo-scientists who should be fired and publicly humiliated. Jerry Bergman was denied tenure and subjected to a hostile work environment at Bowling Green University for his beliefs, despite being the most productive member of his department and most popular teacher. Dr. Myers' website, www.scienceblogs.com/pharyngula, is a focal point for those who oppose intelligent design theory.

Dr. Bergman has written *Slaughter of the Dissidents: The Shocking Truth About Killing The Careers Of Darwin Doubters*, detailing the way Dr. Myers' vision is actually being carried out.

Is it logical to do so? Is it science? Is it education? Is it right? Come and hear. Then decide for yourselves.

Have you considered...

...How insects survive the winter. Some migrate like the monarchs, some die but, what happens to the rest? Insects are cold-blooded and therefore take on the surrounding climatic temperatures whether it is 20 °F, 0 °F or -20°F. How do inserts survive these freezing temperatures? During the Fall, insects start making glycerol (a type of antifreeze) in their bodies and by the time winter takes place, the insect is ready. Now, as an insect's body drops below freezing, the cells do not become damaged. In fact, the wooly bear caterpillars that live in the Arctic Circle can withstand -90°F without dying. Insects can survive as larva, pupa, or adults. Evolution has insects developing the ability to make antifreeze taking place over millions of years; this however, will only produce dead insects in the dead of winter. No, evolution could not have made antifreeze; God made it. The right process of making it and the correct amount would have been needed right from the beginning in order to survive the first winters. But, here is the other question: Why do we need insects to survive the winter anyway. One answer is birds. When birds arrive in the spring, the insects are there as food. God in His wisdom created insects with the ability to survive winter; and then, in the spring proliferate in order to provide a food source for birds.

...stop and consider God's wonders. Job 37:14

CREATIONWISE

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Coming Up . . .

Dec.—no meeting or newsletter.
 Jan. 19—Julie Von Vett—Gospel in the Stars
 Feb. 16—Clyde Billington
